Shaunak Parashari Tel. No. [REDACTED]

Disease: Colic pain and cold & cough.

Duration of illness: 4-6 months.

Duration of treatment: 2 1/2 months.

Percentage recovery: 95%.

I am the mother of Shaunak who is now 9 1/2 months old. My baby was suffering from colic pain and also had frequent diarrhoea and cold and cough. I tried allopathy for my child which though cured my child it could not prevent his diseases.

Here I learnt a proper way of home taking care of my child's food intake, and a proper way to take care of him. I learnt to set my child's diet. As advised by the doctor I started giving to my baby fruits and other solid food. This along with the medicines cured my baby. Shaunak is now fine and I believe he now has minimum medicines.

Homeopathy has not only helped cure Shaunak but has also prevented his diseases. The doctor's good guidance and advice has helped me take care of my child in a proper and healthy manner.

The telephonic services and services of the compounder was also very good. I got good attention for my child's problems over the telephone.

The fee structure is also very simple and hassle free.

As a suggestion to other mothers I would recommend that you trust the doctor and follow his advice and guidance. I am sure all infants would be ~~not~~ not only well but all diseases will be prevented.

The biggest and best solution that we have got from Dr. Mehera is that we have got rid of Packaged Baby Food like Lactogen & Cereals.

Thanks & Regards
Pujali Parachari
