

Epistaxis, Recurrent cold &
Ashaan Gussain Cough
Aryan Tel No [REDACTED]

→ We have two sons a 6 year old & 2 year old. As most parents, we have also been facing the same problems of consistent cold & cough. Treatment for the 2 kids. Usage of antibiotics was also not helpful. Recommended by a friend we visited Dr Sunil. The first appointment itself was heart warming. The personal involvement and commitment was the highest level. Dr Sunil Mehra's way of treatment process to heal his patients illness from the root levels and make them healthy so that their immune system can become strong. In today's world where people have forgotten the values of personal involvement, patience and humanity, Dr Sunil is the best living example of these values. My kids have had very positive healing and improvement in their health. Dr Sunil Mehra has a very organised and committed approach towards his patients. He also gives a very positive approach in tackling situations. He is very honest and forthright about his views and also thinks about the best for his patients. In true sense he is a doctor with a humanitarian approach. If we have many more doctors like him in this world it would be a blessing for human beings. My kids have reached almost peak levels of good health and I can only say these few good words about Dr. Mehra.
