# Ureteric Stone

Melody Sharma, Telno

Two weeks back I was diagnosed with ~~ure~~ ureteric stone measuring 9mm, I consulted a specialist who suggested I go for endoscopic operation. I was totally confused. The first thing that came in my mind was Dr. Sunil who had been treating us for minor illnesses for a long time. I don't know but I just believe that he will do something. So I came to him and after meeting him my hope came to life.

My treatment started with a strict natural diet and believe me, the stone came out by itself. Now I am relieved and happy. And ~~in a couple of days~~ that the stone came out in 2 (Two) days.

I thank God that He gives us some Doctors like Sunil who cares for his patient and showed loyalty to everyone.

And last but not the least, any treatment can become fruitful when we believe. Because when we believe, we obey all instructions and follow them methodically. So we should believe in the Doctor and follow his advice for lifetime.

God bless You.

N.B - There was no pain when the stone came out.
