

Mrs. Shobha R. Mehra

Tel. No. [REDACTED]

Disease - DIABETESE

I have been under Dr. Sunil Mehra's treatment for Diabetes since few years. Recently in the middle of June '06 I had developed 'Third-Nerve Palsy' of the left eye in which the eye lid had dropped & the movement of the eyeball was restricted. There was also 'Diplopia' developed in the vision. There was tremendous amount of pain in the eye. The eye doctor had suggested me to take steroids for this problem, otherwise it will take quite long may be 6 months to fully recover. But Dr. Sunil

was totally against this - His advice was to bear the pain, take his medicine along with allopathic pain killers & to wait & watch. Slowly he reduced the allopathic dose as the pain started reducing. With my faith in him with Dr. Sumil's correct diagnosis, his sincere and honest effort, his guidance in making changes in my diet, in my life style, in my sleeping habits, he was able to free me of my problem in 2½ months. Now I am absolutely fine with my eye.
