

Calcaneum Spur, Osteoarthritis

Hip pain,

SKIN FUNGAL INFECTION.

Astha Gupta

Riya Gupta

Firstly, I'd like to discuss about my daughter Riya's skin problem. Riya was suffering with severe fungal infection in her foot and specially in toes. This all started when her feet remained drenched in rain-water ~~at~~ on 26th July floods. After that Riya was getting this fungal infection repeatedly. In this fungal infection she used to have blisters (small & big) around her toes or in the sole of her foot. It was very painful and the blisters were watery too. She could not even walk at times properly. I tried many allopathic skin specialists, but all gave me temporary relief. The procedure of these doctors was also painful as it included cutting of the wound. I tried nearly everything, changed doctors, but to no help. Moreover the medications included steroids which even led to her weight gain. One day, a very close friend of mine suggested me to consult Dr. Mehra about it as she and her family had overcome such problems in past.

Then I started with the homeopathy treatment. Dr. asked me to have faith and patience in the treatment as it had gone very older also. I had been under Dr.'s treatment since last $1\frac{1}{2}$ year and I am very happy and satisfied with the treatment. ~~She~~ Riya is still under the treatment. Last rains gave her blisters twice or thrice. And this year she had just got it once. Amazingly, I'd been very satisfied with the treatment as the pain & trauma I was facing seeing my daughter is now no more. Riya is also happy to take sweet pills instead of painful cuts & injections.
