

Sujata Kumar Tel No [REDACTED]

Myself Sujata Kumar suffering from Psoriasis from last four years. Initially I have started with allopathy medicines but didn't get any result even after that I have tried one homeopathy doctors medicine for one year but still didn't get any result. After that one of my friend told me about Dr. Sunil Mehra's homeopathy clinic. From last 7 to 8 months I am taking the treatment from him and now I am 95% cured compared to my starting stage of psoriasis.

It is my advice to all the patients of psoriasis that do not see the time required for cure, just take the treatment & then see the results because psoriasis is such a disease which takes time & if you do not follow the proper way it reacts. So if you want to cure yourself 100% just believe in doctor & take the complete course. You will be free of such diseases.

When I have started my course in the 1st month doctor told me about our food habits which generally no doctor suggests us & which is very very important to cure the disease from its root cause. Even though it is not possible for us to follow it 100% but still we can try for same & atleast improve 50% of that you yourself will get the results.

One thing I would like to tell you about the services provided in the clinic like appointment over telephone even if have any problem coming to the clinic doctor gives his advice over telephone also. Doctor also have the facility to give the medicine through courier which I have not used but it is useful for those patients who lives far away from the clinic.

I truly believe on homeopathy as it is a medium used to cure the disease from its source & for the permanent period.

And one thing which is almost important is the doctor itself. A doctor is a person who is responsible to cure your disease.

It's doctor who helps you to come out of such horrible non-bearable pains of psoriasis. Therefore believe on him. I specially would like to say thanks to Dr. Suresh Mehra to increase my confidence which is most important in this process. Initially when I came to the clinic first time I was totally lost my hopes for cure. But doctor said that he will help me out to come across such pains & to be perfect for the life long. This are the efforts, knowledge & efficiency of the doctor which help us to recover from disease. Doctor also adopts the latest techniques to communicate with his patients which are very much useful on patients point. Here the compounders are also genuine & of kind nature, never arguing & providing the complete assistance required at all stages.

Here the fee structure is also very simple & easy not like them who run their clinic for money (convey many) purposes.

Doctor also suggest what to eat & what not to eat. We should follow that if we want the complete cure. Please do not neglect this valuable suggestions given by doctor.

Finally I would like to conclude here with some of my suggestions.

- (1) Believe in yourself & doctor
- (2) Follow the suggestions given by doctor - specifically food habits
- (3) Do not lose the time required to cure the disease. In this shorter time of your life you will be free of problem for rest of your life.
- (4) Visit the clinic regularly & take the medicines.
- (5) Do not stop the medicine unless confirmed by doctor.

I am 100% sure that you also will be psoriasis free like me if you take the complete treatment from doctor.

— Sijata Kumar

GOD BLESS YOU.
