5. Role of Patient → 95 % (during treatment)
6. Compounder's Service → Excellent
7. Fee Structure → Worth having treatment (Even more)
8. Importance of Parhez → NECESSARY EVIL

Dear Readers,

After reading this feedback books, I drew 1 question in my mind. "Is/Are these feedbacks genuine?", as I felt lot of people have boasted about the treatment?

But then I met Dr. Sunil Mehra, and no wonder, the real purpose for what God has sent us all on earth is fulfilled.

Today, as I'm leaving this city, I beg each one of readers to understand, listen and implement to what I'm going to state in the next page.

— Please continue reading —

I came here with an ugly face, full with Pimples, acne and with my stomach issues and other menstrual issues.

Doctor asked me to stop using my mind & simply follow his advice.

He asked me to refrain from all the ~~to~~ "Wrong food" (I say they are equivalent to Poison),

and simply start eating to what he suggested.

He told I after a long time felt that somebody I should have met since I was born, has finally met me.

I regularly & meticulously followed his medication and ate right food at right time & right combination.

Even I could not believe that people who spend crores of Rupees in getting treated for their problems in multi functionality hospitals are wasting their time & money in vain.

No wonder, you might be eager to know the effect I had after getting treated.

To listen, presently I'm getting treated & since the day 1 to today after 3 months, I have healed to almost 80%, where earlier

Next page

I did not like to see my face in mirror & today I can't stop standing for more than 5 minutes.

Doctor does not treat you here, he gives you the real essence of living your life which you have been waiting till back these years.

I'm not boasting, neither there is anything superficial in this feedback of mine

I request you not to get in debate with Doctor for what he prescribes, but to ethically follow & I promise you

"YOU WILL FEEL IN HEAVEN"

Thankyou Doctor, for providing me the way to live my life & to become a human instead of a social animal"
