

SKIN → Ringworm
Kosha Dangaswala

Hi all, I have been suffering from a skin disease where I had red patches all over my hand & neck. This happened since I came back from an official trip to Delhi, initially I thought these are only rashes because of heat, but later on it developed a lot & I went through a lot of pain & itching which was unbearable. I tried all home based ways but nothing helped. Being an I.T. person my first source is always internet, so I searched for a ~~derm~~ dermatologist in Andheri wherein I got a reference of doctor. When I came here I understood that he is a homoeopathic doctor, initially I had a little double mind but then I thought that if I take it, it will go from root rather than just suppressing it. So I started coming here & on day one only doctor developed that confidence in me that I would be well very soon & that's what happened, today my problem is almost cured & I sure it will be completely normal in a few days. The services given here are really good & if you religiously follow what the doctor says you can be normally before the time he

told you or committed you to be normal.
I am really thankful to you & I also
learnt the actual meaning of the
phrase here "Health is wealth".
