

Hyperpigmentation

Ananya Welling Tel No [REDACTED]

First of all I would like to express my heartfelt gratitude to Dr. Meha for completely healing my daughter's skin condition.

That said, Ananya had these dark spots growing on her neck and these were quite prominent, so we came to this clinic. On the 1st day - the 1st appointment - Dr. Meha took an amazingly long time to explain the correlation between diet & disease to my daughter & me as well - in a way that my child also could understand! And this was very important. At times, he may come across as very harsh or strict - but that he only has the best interest of the patient at heart & focuses totally on curing the disease completely becomes extremely clear.

He warned us not to expect immediate results & asked Ananya to strictly monitor her diet & keep a diet chart. The weekly visits that are to be attended are good for reinforcing the diet habits. This is aimed at helping the patient help herself or himself. A totally health giving diet, with zero '-ve' food stuffs entering the body allows the body to focus on getting rid of the disease that the Dr. is healing for [As the Dr. says!]

It was this that made me feel very confident of the fact that Ananya ^{would} get healed completely.
