

Tennis Elbow.

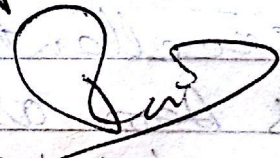

Rajan P

I started learning to play lawn tennis at the age of 49 in Oct 2007. Within four weeks I could grasp the game but landed with tremendous pain in my right elbow.

Dr. Sunil Mehra diagnosed this as tennis elbow and started his medication. But he asked me to stop playing the game till further instructions. He has assured me complete recovery and even play tennis again.

After two months today 90% of the pain has disappeared and he has promised that I can start playing in next two weeks time. It is noteworthy to mention that I have not taken any painkillers during this two months except his medicines.

I will keep you all posted on my recovery.

24-03-08

Well now the pain has totally disappeared and am playing 2/3 days a week lawn tennis. Thanks to the doctor and his method of treatment and his confidence as he had promised me complete cure before starting his medicine!
